DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no clear antecedent basis for "said support platen" (claim 1, line 4), "the slide guide" (claim 5, line 1), or "the other" (claim 5, line 2).

Further, the exact meanings of the phrases "by a length", as recited in claim 5, and "in accordance with to", as recited in claim 8, are vague and indefinite.

Also, claim 8 is confusing in that it is unclear whether "said taking away conveyor", as recited in the last line thereof, is meant to be a different conveyor than the "receiving conveyor" as previously recited in line 1 of claim 8.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 4, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Felder.

Felder shows an unloading assembly comprising a container or "cage" (2) containing stacks of articles (20), a support plate assembly (12) pivotable between an erect position and an inclined position (see Fig. 3), an expeller means (18), and a conveyor (8) having two moving guides (23). It is pointed out that the specific type of article being unloaded is not deemed to be patentably significant.

Allowable Subject Matter

4. Claims 2, 3, and 5-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Specification

5. The abstract of the disclosure is objected to because it is replete with legal phraseology such as "means" and "said" which should be avoided. Correction is required. See MPEP § 608.01(b).

Priority

6. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brown, Sr. shows a receiving conveyor hinged about a horizontal axis.
